

CUSTOM RESIDENTIAL
AND COMMERCIAL
REAL WOOD DOORS

INDULGE IN
the Extraordinary

Old-World Craftsmanship meets today's technology

WoodMax specializes in hand-crafted, custom wood doors and specialty millwork for distinctive commercial and residential building and remodeling projects.

We combine old-world craftsmanship with the latest in technology. Our craftsmen take pride in every door they create, and it shows in the finished product. Our attention to detail results in a level of product quality that is truly unparalleled in the marketplace.

From all aspects of design – door styles, artistic, elements, glass work, finish, and hardware selection – everything is custom made to order. We offer the highest level of personal service on every order, ensuring our customers get exactly what they want . . . doors that are personalized, unique and extraordinary.

Add a little WOW to your welcome.

The entry to your home makes a statement not only about your home, but about who you are. Whether rustic or elegant, subtle or bold, large or small, you can have the entry that you want. A WoodMax entrance will welcome you and your visitors with a long-lasting and outstanding impression of beauty and quality, increase the value of your home and provide many years of enjoyment.

If you choose to add a design to your door, you can make a dramatic statement with your entrance that will truly "wow" your guests. You may even find them standing outside your entry admiring the beauty of your entry door rather than ringing the bell!

Your interior doors should complement and enhance the interior design of your home. WoodMax doors achieve this in an unparalleled manner due to our ability to provide custom door styles, as well as our unique option to add artistic touches through hand carvings, engravings, glass-work, and inlays. We can carry any design element from your home's interior onto your doors and tie the design together in a way no one else can. We can also use custom wood types to match your interior millwork or cabinets.

Whether making a statement with all of your interior doors or adding distinct detail to a pantry, nursery, or game room, WoodMax doors will achieve the look you imagined. Bring your ideas, and we'll bring them to life.

UNIQUE PRESENTATION

MINNESOTA-MADE RESIDENTIAL DOORS

If you can imagine it, we can create it

Finishes

WoodMax offers premium grade factory finish for interior and exterior doors.

The most common interior finishes are pre- and post-catalyzed conversion varnishes and UV-cured coatings.

Typical exterior finishes are marine-grade spar varnish and exterior grade polyurethane, in both solvent and water-based formulations.

These finishes have been proven to be the best and most durable types of finishes for door applications. However no finish lasts forever. It is very important to do frequent inspections of your doors' finish, especially for the exterior doors.

From retail stores, to places of worship, to restaurants, resorts, and banks, WoodMax specializes in custom wood doors for almost any commercial application. Business logos on the door? We can do that. Louvered doors? We do those, too. Unique door designs, complex hardware machining or custom sizes are our pleasure.

From rustic to elegant, in any quantity, any size, or any wood type, we can meet your needs. WoodMax welcomes your most difficult challenges! And, because we are a custom, made-to-order manufacturer, our doors are available with or without glazing, pre-finishing, pre-hanging or machining.

You can find WoodMax doors and millwork at some of the finest retail, commercial and institutional establishments across the country:

Interior Door Styles

Since WoodMax is a custom manufacturer, we make virtually any and every style of door. Any type of square or arched shape is available. Raised panels, flat panels or plank style panels can be incorporated into your door. Flush doors are also available.

Interior pre-hung doors include:

- Solid wood, interior jamb
- Any jamb width
- All brass, heavy duty, ball bearing hinges in a variety of finishes
- Pre-fitting of door into jamb prior to shipping to ensure proper tolerances
- Pre-machining for all hinges and lockset hardware

Exterior Door Styles

Any entrance configuration is available, including door only, door with 1 or 2 sidelights, door with transom and sidelight(s), and radius top door and/or transom. All configurations are available pre-hung in matching, solid wood jamb or manufactured to fit into an existing jamb.

Exterior pre-hung doors include:

- Solid wood, exterior jamb
- Any jamb width
- All brass, heavy duty, ball bearing hinges in a variety of finishes
- Hydrosill or adjustable aluminum sill in a variety of finishes
- Complete weather-stripping installed
- Double rabbeted jamb for storm door configurations
- Pre-fitting of door into jamb prior to shipping to ensure proper tolerances
- Pre-machining for all hinges and lockset hardware

... in the details

Residential Hardware

A full selection of door hardware is available in all standard finishes to provide that final touch to your door. We can accommodate any design requirement and price range. Long lasting, solid brass, heavy duty ball bearing hinges are used on all of our doors. We also offer the option of adjustable hinges which provide ease of maintenance for double door applications and new log homes.

Commercial hardware

Machining for commercial hardware is always available. We have experience with pivot hinges, exit devices, overhead door stops, mortise locks, folding and sliding door hardware, and more. Our engineering, CAD-CAM and CNC machining capabilities allow us to provide accurate commercial hardware preparation for every job.

Glass

Add glass in your door, sidelight or transom with a myriad of glass types.

Thermal panes are common in colder climates and can be supplied with low E coatings or argon filled, if desired. Textured glass is available to provide privacy, while accommodating your design intent. Stained and leaded glass designs range from subtle to dramatic, are completely custom, and can complement other design elements in your home or business.

Strong to the Core

WoodMax doors are laminated with solid wood on both sides of a high quality plywood or composite core. WoodMax does not use thin veneers or cheap particleboard cores. This provides superior stability and strength compared to just two layers of solid wood. Our approach also means you can avoid the peeling, chipping and delaminating often associated with thin veneers.

State-of-the-art equipment combined with the highest quality tooling creates precision machined cope and stick profiles that allow the best possible bonds between glued surfaces. When coupled with our 4-inch long hardwood dowels, an exceptionally strong joint is created, providing true long-lasting quality.

You may not be able to see all these outstanding quality features of our construction methods, but you will have the satisfaction of knowing they are there. And you will be reminded of it by the solid, heavy feel of the door every time you use it.
